Career objective

Desired position: Delivery manager/Engineering manager/RnD director

I am all-in into managing complex issues and deliver the high-quality products. Being a software developer for more than 12 years, I have built the good engineering base and SDLC understanding. For the past 5 years I have been working as engineering manager, managing teams from 4 to 15 people. As a manager I enjoy empowering and inspiring people, building strong teams and culture within organization. I truly believe in leadership by example, and think that success comes with honesty, dedication and hard work.

Core competencies:

- People management: performing 1 to 1 meetings and building PDPs, leading team process and direction, conflicts resolving
- Project management: building and controlling delivery plans, managing resources and cost, risk and change management
- Engineering: software developer for more than 12 years, building complex, high-load solutions, maintaining CI/CD and automation process
- Leadership: building team environment and culture, embracing and influencing company values, leading organizational initiatives and process improvements
- Certified Agile practitioner and Scrum Master
